

Dear Camp Families and Friends,

Your week and session dates are: _____

Summer 2021 is just around the corner and we at Colorado Lions Camp are so excited to see your smiling faces (well under those masks). We have some new guidelines that we want to get out to you before your arrival.

Due to updated guidelines we need a few things from families/caregivers to make this summer safe and successful. If you have your COVID-19 vaccine, could you please provide a copy of it to us before you arrive to camp. If you don't have the vaccine or are not planning on getting it, then you will need to provide proof of a negative COVID-19 test that was taken at least 3 days prior to arriving for your session.

Masks will be required at all times(other than sleeping, drinking and eating). Please make sure the camper is prepared to wear it at all times and has enough masks to get them through the week. I understand that some might have to do the face shield due to doctors' orders but MASKS must be worn properly in order for the camper to attend camp. We will social distance and try to be outside as much as we can during your camper's week while still maintaining safe practices.

We are asking that you log the campers temperature two weeks prior to camp and bring that sheet to check-in. We will screen each person and their driver before entering the building. Please note you will only be allowed one person to accompany the camper at check-in. We will still be giving campers awards on Fridays, but unfortunately no guests will be allowed.

We ask that you follow these guidelines and protocols so we can run a safe and successful summer.

Thank you for your continued support and understanding,

Colorado Lions Camp Staff
